

Using the powerful Adaptive runtime control engine, the Cerberus independent monitoring system is designed for installation on process machinery and utilities. Whether it be monitoring to meet legislation or used as a tool for collecting usage data Cerberus captures process variables and stores them as history files. As a cost effective and user friendly alternative to paper and electronic chart recorders Cerberus offers full networking and remote access capabilities.

### Applications

- ⓐ Medical Sterilization & Disinfection
- ⓔ Food Storage & Refrigeration
- Ⓡ Water & Effluent Treatment
- ⓑ Factory Energy Usage
- ⓔ Chemical Tank Farm Monitoring
- Ⓡ Commercial Property Utilities
- Ⓤ Leakage Detection
- Ⓢ Boiler Monitoring

### Specification

- ⓐ Touch Screen PC (6.4" to 12.1" display)
- ⓔ Windows XP Embedded OS
- Ⓡ Web Browser Software
- ⓑ Expandable PLC I/O Device
- ⓔ Local History Storage
- Ⓡ Report Printing of Graphs
- Ⓤ Open SQL Database
- Ⓢ Animated Mimic Diagram
